

Case Study on Copyright.

Date: 9th August 2021

Q1. What they should do?

Answer: SDX alliance should substantiate Ralph's claim that his former employer was out of Business. The alliance can also continue to review the code while Ralph works on some other code.

If new code can be developed it would have less chances to get copyrighted again.

Q2. What is your opinion about the copy right issue of SDX alliance? Do you feel its very serious.

Answer: SDX alliance is a big company, and copyright issues will impact the company adversely. It is very serious as firstly Ralph's used his same code again which he used previously for the company he worked in the past. Since no other company has legal rights to use the same code they already created one, its a serious issue.

Q3. What will you do if you are in Ralph's place?

Answer: I would completely write the whole code again with my knowledge, which I used previously to make handsome code quality.
